Final examination of the Advanced CG 2012

1> Please upload all the source codes and documents to TA before Jun. 15, 2012 (inclusive). This is a firm deadline, no extension.

2> Your marks will be based on three parts, presentation, demo, and “source code and project report”.

3> The presentation slides and the project report should at least include the following sections: background introduction, system structure design, key algorithms used, experimental results, and references.

4> The presentation and demo will be arranged on Jun. 15, 2012. For each group, the time for presentation + demo should be less than 20 minutes. It should be noted that the presenter(s) should be different from the one (or ones) who did the mid-term check presentation.

At last, I should say million thanks for your continuous support and attention on this course throughout the whole semester.
