Assignment 2 (Due: Dec. 04, 2016)

1. **Programming.** In this assignment, you are required to implement the bird-view generation process as discussed in our lecture.

The GUI of your software can be configured as the above figure. After pressing the button “Generate bird-view”, the program will capture a snapshot of the scene, create the corresponding bird-view image, and finally display it on the right pane.

We will setup three hardware kits. For assignment check, you need to contact the TA and book a time slot.
