Requirements for the Paper Presentation for the Course Digital Image Processing, spring 2013

1> This paper presentation work weighs 10% of your final score.
2> One or two students can form a group.
3> For each group, you need to select one paper, based on which you should prepare some PPT slides and give a presentation in our class on May. 08, 2013.
4> The paper should be selected from the following journals, or conference proceedings,
   - IEEE Transactions on Image Processing
   - IEEE Transactions on Pattern Analysis and Machine Intelligence
   - Pattern Recognition
   - Computer Vision and Image Understanding
5> The presentation should be around 10 minutes. It can comprise the following parts (but, not limited to), background introduction of the problem, motivation of the proposed work, key ideas of the proposed work, main methodology introduction, experiments or results, and related discussions, etc. It would be great if the presenter could give some novel ideas to improve or extend the work further.
6> It is strongly encouraged to deliver the presentation in English, since we have international exchange students in our classroom ☺️.
